

My wife and I RV all over the country. We depend on XM radio as we travel. Local radio stations come and go but we can depend on XM radio 24 hours a day and in any area of the US. Weather is also a consideration when traveling. We also depend on knowing what's ahead on weather conditions. Weather reports on XM radio 24 hours a day could be a life saver. I would like to depend on it, wouldn't you if it would save your life?
